PROFILE

RHCSA / RHCE-certified systems engineer with **4+ years** administering **Linux** and Windows server infrastructure across enterprise and government-integrated environments. Day to day I manage RHEL and CentOS servers, Apache/NiFi clusters and **Docker** deployments, and automate application delivery with **Jenkins** and **Ansible** CI/CD pipelines. On the security side I configure **Wazuh SIEM**, fail2ban and Zabbix monitoring for security operations and compliance, and have built a self-hosted **OpenVAS / GVM** vulnerability-auditing platform. Seeking **Linux System Administrator**, **DevOps Engineer** or **Security Analyst** roles in the GCC or remote.

CORE STRENGTHS

Linux Administration (RHEL / CentOS)

Server Hardening & SELinux

CI/CD — Jenkins & Ansible

Docker & Containers

LAN / WAN, Firewalls & VPN

SIEM & Log Monitoring

Vulnerability Assessment

Firewall Configuration

Monitoring — Zabbix / Grafana

Backup & Recovery

Shell & Python Scripting

User & Access Management

EXPERIENCE

Apr 2024 – Present
Kerala, India

DevOps Engineer
PanApps Inc.

- Manage **Linux server infrastructure** across enterprise clients, including Apache/NiFi clusters and **Docker** deployments.
- Implement **CI/CD pipelines** with **Jenkins** and **Ansible** for automated application deployment.
- Configure and maintain **Zabbix** monitoring, **Wazuh SIEM** and **fail2ban** for security operations and compliance.

Dec 2021 – Apr 2023
Dubai, UAE

System Administrator
Leadership Domestic Workers Service Center

- Installed, configured and maintained **Windows Server 2016** and Linux-based infrastructure.
- Configured **LAN / WAN** networks, **firewalls** and secure connections for UAE government integrations (**MOHRE, ICA**).
- Administered attendance and **access-control systems**, IP telephony, mail server and the company website; supported **100+ end users**.

2023 · 6-month contract
Kerala, India

Linux System Administrator
IPSR Solutions Ltd

- Administered Linux servers — kernel upgrades, **firewall**, **SELinux** and **LDAP**.
- Configured **Apache, SAMBA, NFS, FTP and iSCSI**; scheduled backups and monitoring; remote support via SSH.

Jun 2014 – Jul 2017
Part-time · Kerala

Network Administrator
Ravis Agencies

- Led LAN/WAN establishment and implementation; installed and configured operating systems across the office network.
- Optimised system security and performance, ran scheduled backups and implemented internal IT policies.

TECHNICAL SKILLS

Operating Systems: RHEL, CentOS, Fedora, Kali Linux; Windows Server 2016

Linux Administration: LVM, systemd, SELinux, cron, kernel tuning, user & group management, file permissions, troubleshooting

DevOps & Automation: Ansible, Jenkins, Docker, Git, CI/CD pipelines, Apache NiFi, Bash & Python scripting; AWS (EC2, S3, IAM)

Networking: TCP/IP, DNS, DHCP, routing & switching, LAN/WAN design, iptables / nftables, OpenVPN, LDAP, SSH

Security: Wazuh SIEM, OpenVAS / GVM, CVE & vulnerability scanning, ClamAV, ModSecurity, fail2ban, server hardening

Monitoring & Backup: Zabbix, Prometheus, Grafana; scheduled backups and monitoring

Servers & Services: Apache, Nginx, Postfix, SAMBA, NFS, FTP, iSCSI, MySQL / MariaDB, Redis

CERTIFICATIONS

- **Red Hat Certified Engineer (RHCE)** — Red Hat
 - **Red Hat Certified System Administrator (RHCSA)** — Red Hat, Cert ID 170-179-113
- Training completed:** Certified Ethical Hacker (CEH) course — coursework completed; certification exam not yet taken.

SECURITY PROJECT

github.com/
achupradeep3050

VA-Opensource-Audit — Self-hosted security operations dashboard for **agentless vulnerability auditing**; centralised ClamAV management and **OpenVAS / GVM** scanning across a Linux fleet via **Ansible**, with JWT + TOTP role-based access control and consolidated CVE reporting.

Linux · Ansible · OpenVAS/GVM · ClamAV · Python · JWT/TOTP

EDUCATION

Bachelor of Computer Applications (BCA) Rabindranath Tagore University	Higher Secondary (12th) & SSLC (10th) CBSE
B.Com with Computer Application Kerala University	

PERSONAL INTERESTS

Hobby projects — built and self-hosted outside work to keep automation and scripting skills sharp.

AI agent automation: multi-agent pipelines with Python, CrewAI and LangGraph — including a job-application assistant with a Streamlit UI and a portable AI agent that runs from a USB drive on Windows, macOS and Linux with zero host installs.

Algorithmic trading systems: self-hosted 24/7 forex and crypto bots on FastAPI, Django and MariaDB with broker API integrations (OANDA, MetaTrader 5) — good practice in service reliability, process supervision and Telegram-based alerting.

Self-hosted knowledge base: an Obsidian vault with vector embeddings and semantic search used as persistent memory for the agent projects above.

PERSONAL DETAILS

Nationality: Indian	Languages: English, Malayalam
Current location: Aluva, Kerala, India	Open to: GCC relocation & remote roles
