Summary

RHCSA/RHCE and CEH-certified engineer with 4+ years across Linux administration, DevOps, and security. I build CI/CD pipelines with Jenkins, run Docker on Linux servers, automate with shell and batch scripting, work in AWS (EC2/S3/IAM), and keep systems observable with Prometheus, Grafana, and Zabbix. I operate 24/7 services with alerting and automated recovery, and run a self-hosted SOC for vulnerability auditing. I also build my own automation with AI agents (CrewAI) and use AI-assisted development tools (Claude Code, Cursor) day to day — useful as TCS scales its AI-led delivery.

Technical Skills

- **Linux & Systems:** RHEL, CentOS, Fedora, Kali; systemd, SELinux, LVM, cron, kernel tuning, patch management (*RHCSA/RHCE*)
- **DevOps & CI/CD:** Docker, Jenkins, Git, CI/CD pipelines, blue-green deployment
- **Cloud:** AWS (EC2, S3, IAM)
- **Observability:** Prometheus, Grafana, Loki, Zabbix; alerting, incident response
- **Security / SOC:** Wazuh SIEM, OpenVAS/GVM, ClamAV, ModSecurity, fail2ban, iptables/nftables, RBAC (*CEH*)
- **Servers & Data:** Apache, Apache NiFi, MySQL/MariaDB, Redis, SAMBA, NFS
- **Scripting & Apps:** Bash scripting, Batch scripting, Python; FastAPI, React
- **AI Automation:** CrewAI (multi-agent automation I build), AI-assisted development (Claude Code, Cursor, Copilot)

Work Experience

DevOps Engineer — PanApps Inc. (Apr 2024 – Present) - Build Jenkins CI/CD pipelines with blue-green deployment and rollback, replacing manual, error-prone deployments. - Manage Linux server infrastructure, Apache/NiFi clusters, and Docker deployments across enterprise clients. - Run Zabbix monitoring, Wazuh SIEM, and fail2ban for security operations and uptime visibility.

System Administrator — Leadership Domestic Workers Service Center (Dec 2021 – Apr 2023) - Maintained Windows Server 2016 and Linux infrastructure for 100+ users with near-zero downtime. - Configured LAN/WAN, firewalls, and secure connections for government integrations (MOHRE, ICA); administered mail server, access control, and company website.

Linux System Administrator — IPSR Solutions Ltd (*Jul 2017 – Jan 2018*) - Administered Linux servers — kernel upgrades, firewall, SELinux, LDAP. - Configured Apache, SAMBA, NFS, FTP, iSCSI; remote support via SSH; scheduled backups and monitoring.

Network Administrator — Ravis Agencies (*Jun 2014 – Jul 2017, Part-Time*) - Led LAN/WAN setup and OS installation/configuration; security hardening, backups, and IT policy.

Projects — github.com/achupradeep3050

- **VA-Opensource-Audit (self-hosted SOC)** — agentless vulnerability auditing with OpenVAS/GVM and ClamAV across Linux servers; Python/Bash automation; JWT+TOTP access control.
- **jobmind-agent** — a CrewAI multi-agent automation pipeline (scrape → score → tailor → generate) with a Streamlit UI.
- **Hermes-USB-Portable** — a cross-platform portable AI agent with multi-provider model switching and a guardrailed command-line tool (dry-run + audit).
- **24/7 trading platforms (xauusd-fvg-algo, sma_cross_scalp_bot)** — FastAPI/React services on live broker APIs with monitoring, alerting, retry/backoff, and automated recovery.

Certifications

- Red Hat Certified System Administrator (RHCSA) — Cert ID 170-179-113
- Red Hat Certified Engineer (RHCE)
- Certified Ethical Hacker (CEH)

Education

- Bachelor of Computer Applications (BCA) — Rabindranath Tagore University
- B.Com — CHMM College, Kerala
